IMPORTANT PARENT INFORMATION

At the West Cook YMCA, we see no greater expression of our mission than providing childcare for those who are caring for us during this crisis. Our Y is dedicated to converting our facility to an Emergency Child Care Center exclusively for children of health care workers and first responders.

OUR STAFF

are caring, experienced, and trained to provide a safe and supportive environment that fosters the cognitive, social-emotional, and physical development of your child.

YOUR CHILD

will be treated as an individual, where they are valued and recognized as a unique person, where they feel a sense of belonging, can make new friends, and achieve goals that will help them succeed at home, in school, and in life.

DROP OFF & PICK UP PROCEDURES

Parents will drive up to our facility on Marion Street heading towards Randolph. Once registered, a parent will sign-up for a 15-minute drop-off and pick-up block to ensure efficient flow of traffic and that parents/guardians can get to work on-time.

HEALTH & SAFETY

Children showing cold or flu like symptoms like coughing, runny noses, sneezing or above normal temperatures are not permitted into the program. To ensure safety, a health worker will screen each child before they enter the facility each day. This will include taking the child's temperature and reviewing a basic health screen with each caregiver dropping off the child.

If during the program, a child begins showing flu or cold like symptoms, staff will escort that child to a designated comfortable and visible space where they can be further assessed, protected and kept under staff supervision and care until a caregiver can be notified and picks up the child.

The Y follows rigorous cleaning protocols as guided by the CDC and have been developed in collaboration with our local healthcare partners.
